International Winter School 2021

University of Padova

MRInference

From data to knowledge

February 15-19, 2021

Aim

The aim of the Winter School is to present **modern statistical approaches** to magnetic resonance imaging (MRI) data analysis to **improve the solidity of research data**

Main Topics

- Critical aspects of standard (f)MRI Analysis and new perspectives
- Cutting edge Inference with (f)MRI data
- Perspectives in Connectivity Analysis
- Machine Learning methods for prediction

Info

Participants:

Ph.D students, post-doctoral research fellows and early career scholars in psychology neuroscience and statistics

Where:

Department of Developmental Psychology and Socialization

How to apply:

https://www.dpss.unipd.it/winter-school-2021/home

Application Deadline:

November 15, 2020
